Damascus, Syria | [saeedaltout25@gmail.com](mailto:saeedaltout25@gmail.com) | [github.com/Saeed-Altout](https://github.com/Saeed-Altout) | [linkedin.com/in/saeed-altout](https://linkedin.com/in/saeed-altout)

## Professional Summary

- Experienced Frontend Developer with 4+ years building responsive, high-performance web applications.
- Specialized in React, Next.js, TypeScript, and modern UI libraries.
- Growing expertise in NestJS and backend integration for Full-Stack development.
- Strong focus on clean architecture, scalable front-end systems, and user experience.

## Experience

### TechPundits (Full-time Onsite, Damascus)

2024-08 – Present

- Built scalable and high-performance SaaS platforms with responsive design and modular architecture (**Portia.io**).
- Developed a PaaS e-learning platform with advanced dashboards, media galleries, file management, and real-time notifications (**Kadny**).
- Implemented multimedia features and multilingual support for interactive content platforms (**Florain Home**).
- Applied advanced state management using Redux Toolkit and Zustand to ensure maintainable and efficient front-end logic (**MoodMakers**).

### Logic Software Development (Remote Part-time)

2024-12 – 2025-02

- Enhanced fintech dashboard with advanced data visualization, analytics, and reporting tools.
- Integrated secure authentication and financial transaction features (**Apc Prime**).

### MicroTect (Full-time Onsite, Rif Damascus)

2021-01 – 2022-10

- Developed main company website and internal dashboard.
- Collaborated on large-scale platforms, learning REST API integration and project structuring.
- Built bilingual React website for a UAE-based startup, implementing localization, responsive UI, and performance optimization.

## | Notable Projects

### ICBME 2025 – Medical Engineering Conference Platform

**Stack:** NestJS, Next.js, TailwindCSS, ShadCN and PostgreSQL.

- Full conference management system (frontend + backend).
- Implemented QR attendance, session control, auth, and email automation.
- Managed 1,000+ user registrations within hours of launch with no downtime.

### Sanam – Real Estate Management System (Full-Stack)

**Stack:** NestJS, Next.js, TailwindCSS, ReUi and MySQL.

- Real estate platform with advanced filtering, localization, and media handling.
- Designed modular backend structure for scalability and multilingual property listings.

## | Technical Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, Zustand, Vite, TailwindCSS, SCSS/SASS, Bootstrap, ShadCN, Material UI, Framer Motion, Localization (i18next) and next-intl.
- **Backend (Learning & Applying):** NestJS, RESTful APIs, Firebase, AWS S3, MySQL and PostgreSQL.
- **Design & Tools:** Figma, Adobe XD, Draw.io, Notion, ClickUp, Postman, ApiDog, Geria, Discord and Microsoft Office.

## | Education

Bachelor's Degree in Biomedical Engineering

**Damascus University – Syria**

2020 – 2025

## | Languages

- **Arabic:** Native (Fluent)
- **English:** Beginner (Currently improving communication and technical terminology)
